Rural Water District No. 6, Garvin County RV Park Agreement

P.O. Box 636 - 39705 Highway 29 Wynnewood, OK 73098
Phone- (405)665-4436 E-mail- rwd6gc@rwd6gc.com

Name of RV Park: _____

Location: _____

Name of RV Park Owner and/or Operator: _____

1. Rural Water District No. 6, Garvin County has determined the definition of a RV Park. They shall be ONE who divides property into THREE or more hookups for RV or Travel trailer. RWD6,GC will take into consideration the existing waterline size, customers and water availability for the area, and RWD6,GC engineer's recommendation. Approval of any RV Park connection shall be at the sole discretion of the Board of Directors, based on engineering capacity, District policy, and system impact.

2. RV spaces within an approved RV Park are temporary, transient-use sites and are not considered individual residences for the purpose of membership or meter requirements under the District's By-laws. Approved RV Parks may be served through a single District-approved meter upon Board of Directors and District Engineer approval.

3. The RWD6,GC water agreement to extend its water services to said RV Park shall be conditioned upon receipt by RWD6,GC of a written feasibility report from its Engineer, evidencing that RWD6,GC existing system is adequate to provide water needs of the proposed development. The RV Park Owner and/or Operator will be in compliance with laws of the State of Oklahoma, Department of Environmental Quality, RWD6,GC Rules and Regulations and By-Laws. The RV Park Owner and/or Operator must supply RWD6,GC with plans and specifications for the RV Park so RWD6,GC engineer can run a hydraulic analysis. The Engineer's analysis shall confirm adequate pressure, flow, storage, and no adverse impact to the existing customers. RWD6,GC shall have no obligation to approve service if adequate capacity does not exist.

4. It is further expressly understood by and between the parties that RWD6,GC shall not be obligated to extend its services beyond the proposed RV Park to any other development or future development undertaken by the RV Park owner and/or Operator. Any future phases or expansions require new application, engineering review, Board approval, and payment of all applicable fees.

5. Septic system and specifications must be approved by the Department of Environmental Quality prior to beginning construction and a copy of the approval furnished to RWD6,GC. Failure to maintain required regulatory approvals shall be grounds for suspension or termination of service.

6. The RV Park Owner and/or Operator will pay an impact fee to be determined by the Board of Directors and the District's Engineer based on the impact the development will have on RWD6,GC's existing system. The impact fee will be non refundable and non transferable to any other site or property. The impact fee will be assessed per hookup to be developed within the RV Park. The impact fee per hookup is for improvement of the existing system and does not purchase a membership for water service. All impact fees and engineering costs must be paid in full prior to installation of any meter.

7. Monthly Minium Charge for RV Parks: An RV Park served through a single District-approved meter shall be subject to a monthly minimum charge, with no water included, calculated at TWO Dollars ($2.00) per approved RV site. Water will be charged at the current rate. In no event shall the minimum monthly charge be less than the District's standard minimum charge for a single residential unit, currently Forty Dollars ($40.00), or such minimum as may be amended by the Board of Directors from time to time. This minimum charge structure reflects the aggregate demand placed on the District's system by the RV Park and shall not be construed as establishing individual residential accounts. All rates, fees, and minimum charges are subject to adjustment by the Board of Directors in accordance with the District's By-Laws and adopted rate schedules.

8. It will be determined by RWD,GC Engineer the size of meter required to serve the RV Park. All waterlines, valves, and appurtenances beyond the District-owned meter shall be owned, operated, and maintained solely by the RV Park Owner and/or Operator, and RWD6,GC shall have no responsibility for facilities on the customers side of the meter.

9. There will be NO new service in areas identified as floodplains or wetlands unless permitted by applicable law and all required regulatory approvals are provided in writing.

All Parties agree to the RV Park requirements as stated. Adopted 10/10/2019, Revised 6/9/2022. Further revised on January 22, 2026.
